

Sound Module Update Guide

Tool Ver. 1.6

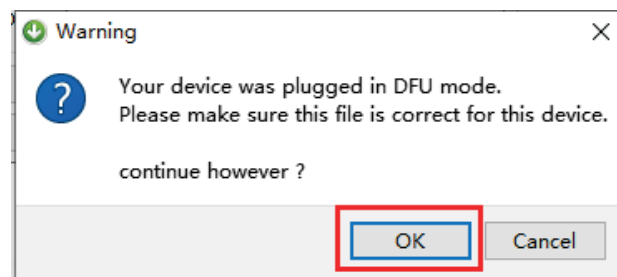

1. Connect the sound module to computer via USB cable (USB B type to USB A type), press and hold both [+] [-] buttons and then power on the module to enter upgrade mode.
2. Run Firmware Upgrade Tool.
3. Click [Refresh], and select **E-DRUM** or **USB A** for both Input & Output device.

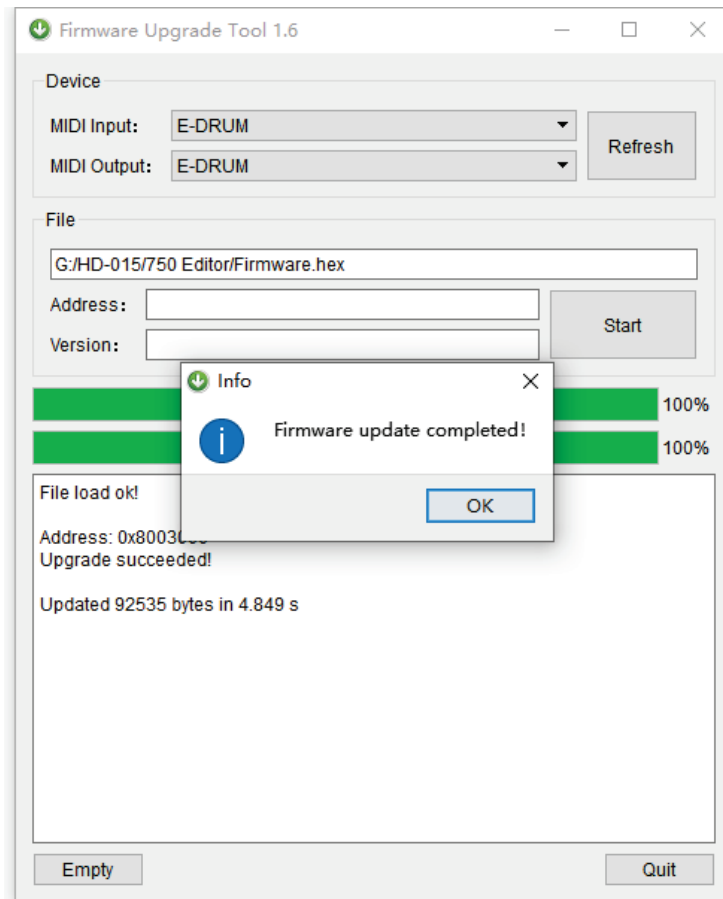

4. Drag& drop the upgrade file anywhere in the window.
5. Click [Start]

6. Make sure the device is in Upgrade Mode. Then click [OK]

7. Wait the progress bar until it shows a completion dialogue.

8. Turn off the sound module by pressing power button.
